A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/7/07 has been entered.

Claims 1-4 and 6-8 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 9-20, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 7/28/05 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jim Hellwege on 6/19/07.

The application has been amended as follows:

Claim 1, line 1, cancel "comprising water".

Claim 1, line 2, after '4.5' insert --comprising water--.

Cancel claims 6-8, 13, 14, 19 and 20.

The following is an examiner's statement of reasons for allowance:

After further review of the prior art of record, the claimed invention is allowable over said art because said art fails to teach, suggest or appreciate a polishing composition, wherein the volume frequency (V), in %, of the abrasive (silica) having a particle size [R] in the range of 40-45 nm is defined by the relationship set forth by the independent claim (V equal to or greater than the sum of the particle size [R], in nm, plus 50). In addition, it is apparent that the volume frequency of the particle size R of 40-45 nm can never be 100% since the claim further states that particles between 10 to less than 40 nm are also present in the composition. In view of this, the prior art is silent as to the high volume percentage of particles in the 40-45 nm size range and a low percentage of those in the 10 to less than 40 nm size range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Marcheschi whose telephone number is (571) 272-1374. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (571) 272-1233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
